

Department of Public Works

DEMOLITION AND CONSTRUCTION WASTE CONTAINER PERMIT

Procedures for Obtaining a Demolition and Construction Waste Container Permit

1. A permit is required if a Demolition and Construction Waste Container (DCWC) is to be stored on-site for longer than seven (7) days. Permits will be granted based upon the necessity of the DCWC for a period not to exceed what would reasonably be expected to complete the work requiring the DCWC.
2. Demolition and Construction Waste Containers must be located on an asphalt or concrete surface and may not be located in a public street or right-of-way.
3. Off-site waste may not be transported to any Demolition and Construction Waste Container located within the City of Crestwood.
4. Demolition and Construction Waste Containers should be leak-proof, odor-free, and maintained in a manner satisfactory to the Public Works Director.
5. Demolition and Construction Waste Containers shall be emptied as necessary, or within 72 hours of notification from the City.
6. A Demolition and Construction Waste Container shall be deemed full if no more waste can be added to it without making it unsafe or illegal to transport, if additional waste could be dispersed from the container by wind or gravity, or if deemed full by the Director Of Public Works.
7. A Demolition and Construction Waste Container shall not be stored in a floodplain.
8. Should applicant have any questions about DCWC permits, please contact the Code Enforcement Officer at 314-729-4724.
